ContactUs@SpacePortIndiana.com.***

Mission 2010 was designed to help teachers and students re-engage in science, technology, engineering and math (STEM). Indiana has an interest in accelerating the educational pathway for Hoosier students in order to meet national need for technology based workforce. Space Port Indiana's<sup>TM</sup> Mission 2010<sup>TM</sup>, helps Indiana teachers and students meet specific educational requirements (as established by INDOE) and prepare for a career. This is done by providing advanced learning environments and subject matter that will ultimately lead to fulfillment of national need. Classes can be customized to meet teacher requirements or time schedules. Classes can be formatted like the Inquiry Based Learning Modules available through Space Port Indiana<sup>TM</sup>
